The knowledge from inside

[Dr. Davide Remotti](#)

Bracco, Ivrea

An overview on the development of a novel imaging molecule seen from the inside of a pharmaceuticals company. Which competencies are strategic for a pharmaceutical company? How are these competencies deployed in a new drug entity development? chemistry (organic, inorganic, analytical, physico-chemical), biology, pharmacology, toxicology etc... a teamwork that allows to start from the idea to the market. Scientific development pathway is parallelized to regulatory and sustainability aspects. The final goal is to improve the diagnostic performances and, finally, to improve patients' quality of life.

EVENTO APERTO A:

Docenti | Teachers, Borsisti | Research Fellows, Assegnisti | Postdoctoral researchers, Dottorandi | PhD students, Studenti | Students, Esterni UNIUPO | external UNIUPO people

SEMINARIO IN LINGUA: English
