Origin of Life: Major Transitions in Prebiotic Evolution

Prof. Francisco Prosdocimi

Universidade Federal do Rio de Janeiro, RJ, Brazil

This mini-course offers an in-depth look at the four major “ages” in the evolutionary path from prebiotic molecules to the emergence of cellular organisms. It is structured around key transitional stages, providing insights into each age’s unique biological and chemical advancements.

SEMINARIO/CORSO APERTO A: Docenti | Teachers, Borsisti | Research Fellows, Assegnisti | Postdoctoral researchers, Dottorandi | PhD students, Studenti | Students

SEMINARIO/CORSO IN LINGUA: inglese
